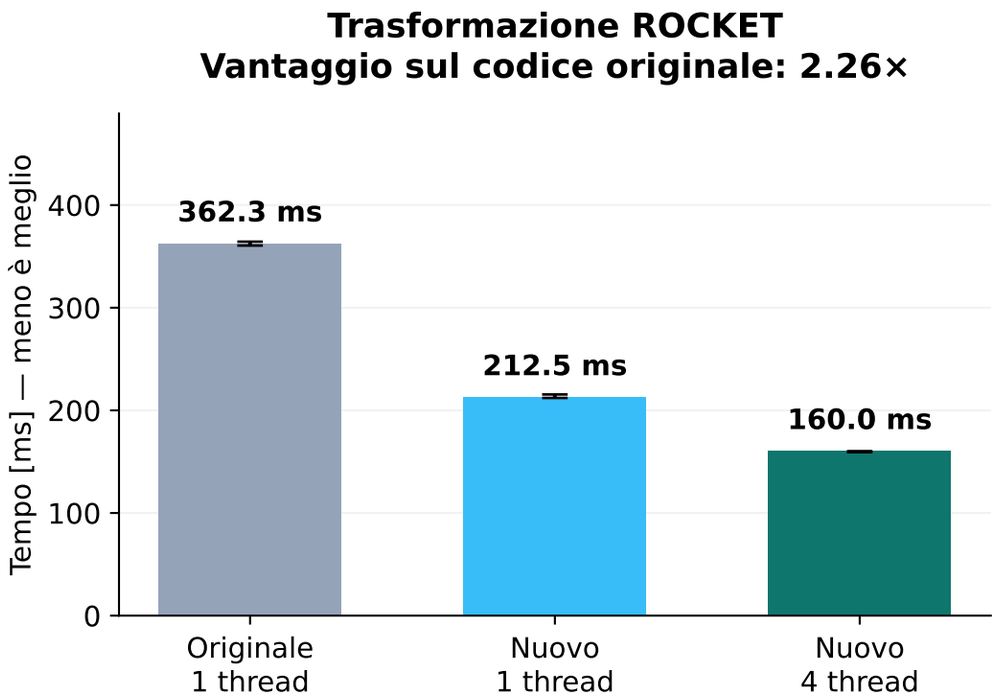
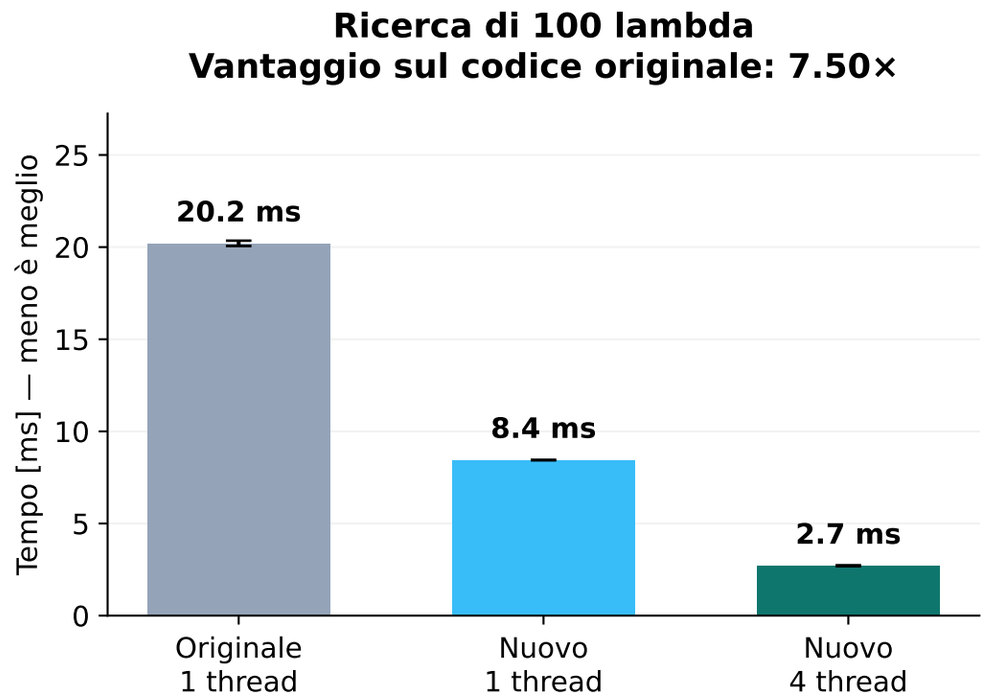
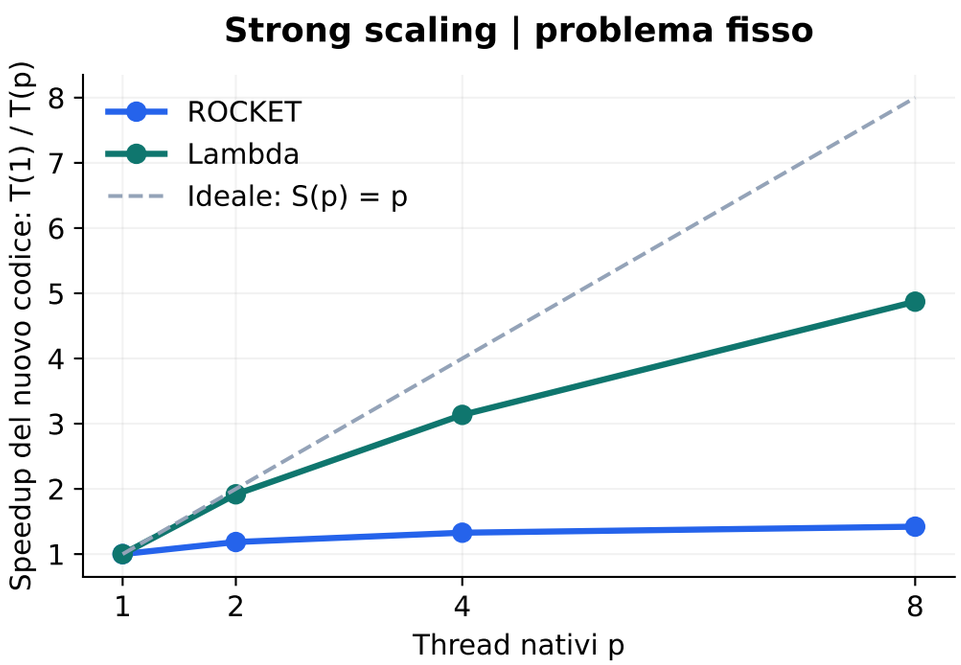
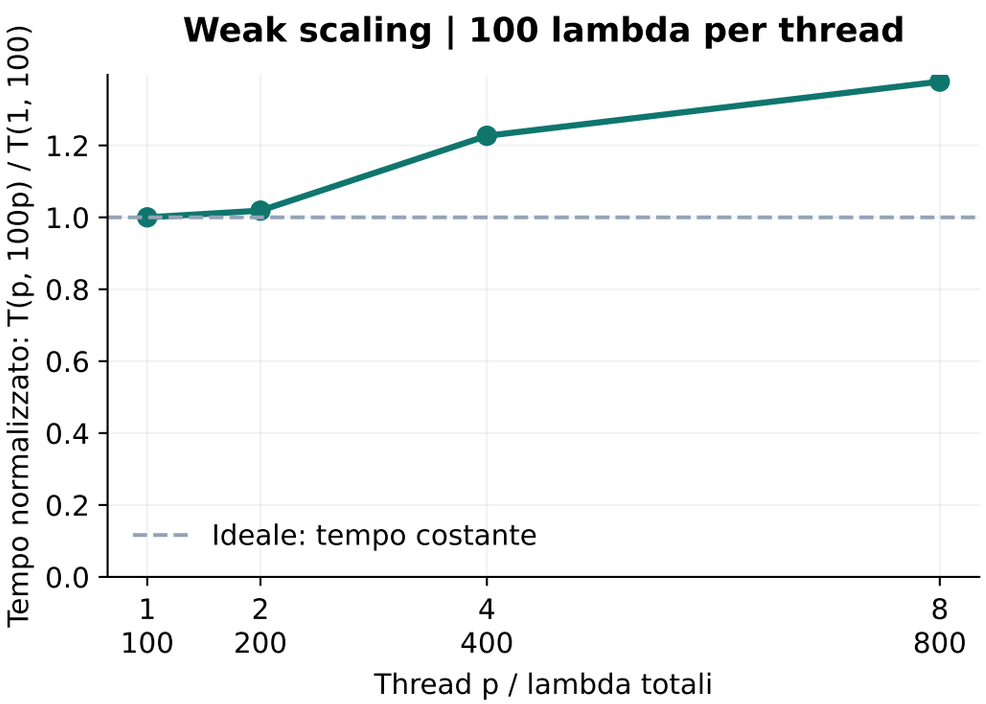
Fed2RC | originale e versione parallela

Hot path su dati sintetici · cache disabilitata nei confronti principali
Apple M1 Pro · BLAS richiesto: 1 thread · mediana di 7 prove · JIT escluso









ROCKET: 512 serie × 256 campioni, 128 seed. Lambda: sistemi 128×128, 4 classi, 128 serie di validazione.
Barre d’errore: quartili 25–75%. Nuovo/1 thread separa ottimizzazione seriale e parallelismo.
Sono misure dei due hot path: non rappresentano il tempo completo di training federato/UCR.
